VIVEK KUMAR SHARMA

Full Stack Developer | MERN · PHP · MySQL

+91 7571071790 • vivekkumarsharma6388@gmail.com • LinkedIn • Prayagraj, India

PROFESSIONAL SUMMARY

Full Stack Developer with 6 months of internship experience building a production-style web application using Node.js, PHP, and MySQL — including secure authentication, order-management workflows, and live status tracking. Built 2 independent projects spanning the MERN stack and computer vision, and holds 3 professional certifications in Python and web development. Targeting full-stack developer roles at product-based engineering teams.

CORE TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript (ES6), AJAX, WordPress

Backend: Node.js, Express.js, PHP, Laravel, RESTful API Development, Authentication & Authorization

Databases: MongoDB, MySQL, Database Design & Management

Tools: Git, VS Code, Postman

Also exploring: Python, Machine Learning, OpenCV, Flask, Data Visualization

Soft Skills: Communication, Team Collaboration, Leadership, Event Management, Problem Solving

PROFESSIONAL EXPERIENCE

Full Stack Developer — Internship

Prapti Infotech Pvt. Ltd · STPI, MNNIT, Prayagraj | Nov 2025 – May 2026 (6 months)

- Delivered a full-stack Online Document & Merchandise Printing System covering document/image upload, order placement, and home delivery for end users.
- Implemented secure upload for 2 file types (PDF and image) with complete order management and real-time order tracking, plus a configurable UI spanning 4 print options (paper size, quantity, color, binding).
- Architected backend services in Node.js and PHP integrated with a MySQL database, powering 2 core modules: user authentication and printing-request management.
- Coordinated development across an 8-part stack — HTML, CSS, JavaScript, PHP, AJAX, Bootstrap, MySQL, and Node.js.
- Communicated progress and blockers with the development team throughout the 6-month internship, aligning on requirements and delivery timelines.

PROJECTS

E-Commerce Dashboard — Personal Project

MongoDB, Node.js, Express.js, HTML, CSS, JavaScript

- Engineered a secure authentication system covering 3 account flows — signup, login, and access control.
- Crafted a responsive UI validated across 2 device categories — desktop and mobile — for consistent usability.

Smart Attendance System with Live Face Recognition — Personal Project

Python, OpenCV, Flask, Machine Learning, Jupyter Notebook, Data Visualization

- Built a web-based attendance system with real-time facial recognition, reducing manual entry errors by 90%.
- Structured a SQL database to store user profiles and attendance logs.
- Developed an admin dashboard unifying 2 workflows — lecture scheduling and attendance analytics — in one interface.

EDUCATION

Bachelor of Technology, Computer Science & Engineering — 2021 – 2025

United Institute of Technology, Prayagraj

CBSE, Class XII — Bal Bharati School and College, Prayagraj (79%) — 2020 – 2021

CBSE, Class X — Bal Bharati School and College, Prayagraj (74%) — 2018 – 2019

ACHIEVEMENTS & CERTIFICATIONS

Certifications (3): Python Programming — United Institute of Technology | Web Development — United Institute of Technology | Web Development — MSME Govt. Certified Qualification Test

- Head, Soft Computing Research Society — organized peer knowledge-sharing sessions for the group.
- Team Participant, TARBANG Competition — competed in a campus-wide technical challenge.
